

# Sash Support Systems

## 62DV Series Devac Overhead Channel Balances

Single Spring Channel - Aluminum 9/16" Wide x 5/8" Deep  
 Double Spring Channel - Aluminum 9/16" Wide x 13/16" Deep

**900-9036**  
Standard Bell Clip Attached

### Ordering Information

- 1) Measure metal channel length.
- 2) Check number old or new stamped on balance (e.g. 111 or 1210).
- 3) Select our corresponding part number from the chart below and order accordingly.
- 4) All balances come with 900-9036 attached.

### General Information

- 1) All balances now use Dacron cord. Stainless steel cable with copper hook terminal is no longer being produced.
- 2) It is important to note how much cord extends from your balance to the window sill (in inches) in order to ensure the proper amount of cord travel. Our chart will indicate standard lengths but if additional inches of cord are required, add a plus (+) sign after the part number and indicate the number of extra inches of cord required.
- 3) When the letter "D" alone is stamped on your balance, it denotes a double spring. "HD", on the other hand, simply denotes heavy duty.

Old Balance Number	Old Balance Length	New Balance Number	New Balance Length	Standard Cord Length in Balance	Sash Weight Per Pair	Our Part #
111	12-3/4"	1210 HD	13"	31"	4-7 lbs.	62DV-1210HD
