Large Stainless Steel Ring with  
Locking Screw Threads.**

1. Take the ring of beads to your job repair site so you can identify broken beads in a minute.
2. Avoid the clutter of keeping your samples in a bag or box, losing pieces, and save time with the ring program.
3. Each ring keeps all your glazing bead samples together and organized so you are not losing samples, and can find them all right away to identify the bead you need.
4. Each bead has a label with part number on it. You can add or remove beads as you need to or reorganize the beads the way you want them.
